Computer Applications

Курбатов Максим Владимирович • группа о-П-923/3

I. Translate into Russian

1. to adjust — регулировать, настраивать
2. advanced — передовой, сложный
3. to amend — изменять, исправлять
4. to assist — помогать, содействовать
5. to conjure — вызывать в воображении
6. to contribute — вносить вклад, способствовать
7. conversing — общение, ведение разговора
8. to check in — регистрироваться
9. to maintain — поддерживать, обеспечивать
10. to enable — давать возможность
11. a marvel — чудо, поразительное достижение
12. to execute — выполнять
13. random — случайный, произвольный
14. to guide — направлять, управлять
15. to rely on — полагаться на
16. an image — образ, изображение
17. a relative ease — относительная лёгкость
18. huge — огромный
19. to resemble — напоминать, быть похожим
20. launching — запуск
21. a terminal — терминал

II. Read the text

The text “Computer Applications” has been read.

III. Translate into Russian

1. some experience of conversing — некоторый опыт общения
2. view data facility — возможность просмотра данных
3. to obtain information — получать информацию
4. powerful, intelligent machine — мощная интеллектуальная машина
5. to be staggered and fascinated — быть поражённым и восхищённым
6. to adjust operations — корректировать работу
7. enormous number of calculations — огромное количество вычислений
8. advanced technological problem — сложная технологическая задача
9. to guide telescopes — управлять телескопами
10. ancient civilization — древняя цивилизация
11. arithmetical operations — арифметические операции
12. logical decisions — логические решения

13. to execute instructions — выполнять инструкции

14. efficient storage — эффективное хранение

IV. Translate into English

1. to use a terminal connected to the main company computer
2. to press keys on a keyboard
3. to obtain information
4. different images
5. a computer turns machines on and off
6. to develop equipment for exploring the Moon and other planets
7. sensitive equipment
8. to analyze experimental data
9. can be used to compose music
10. work controlled by a computer
11. to help scientists identify
12. cannot think for themselves
13. to be good at carrying out
14. to contribute

V. Give the situation from the text

1. People have some experience of conversing with computers when they use a personal computer, a terminal at work or a television with a view data facility.
2. The word “computer” conjures up different images and thoughts depending on people’s experiences.
3. Without computers, it would be impossible for engineers to perform the enormous number of calculations needed for many advanced technological problems.
4. Computers help in building spacecraft and assist flight engineers in launching, controlling and tracking them.
5. Computers enable architectural and civil engineers to design complicated bridges and other structures with relative ease.
6. Astronomers use computers to guide telescopes and process photographic images of planets and other objects in space.
7. A computer-generated work may resemble the style and form of a particular artist’s work, or it may appear abstract or random.
8. Computers do not have intelligence in the way humans do and cannot think for themselves.
9. Computers carry out arithmetic operations and make logical decisions at a phenomenally fast speed.
10. Computers can store huge amounts of information on magnetic media, and the information can be retrieved quickly.

VI. Fill in the gaps with the necessary prepositions

1. People may use a terminal from the main company at work.
2. A clerk can press keys on a typewriter.
3. The word “computer” conjures up different images.
4. A computer turns the machine on and off.

5. Computers help in the building of spacecraft.

6. They are used to develop equipment for exploring the Moon and planets.

7. Chemists and physicists rely on computers to control sensitive instruments.

8. Computers don’t have intelligence in the way humans do.

9. Computers are good at arithmetical operations.

10. Computers can store huge amounts of information on magnetic media.

VII. Agree or disagree

1. Disagree. Many people have or will have had some experience of conversing with computers.

2. Disagree. The word “computer” conjures up different images and thoughts in people’s minds depending on their experiences.

3. Agree. According to the text, without computers engineers could not perform the enormous number of calculations needed to solve many advanced technological problems.

4. Disagree. Computers enable architects and civil engineers to design complicated bridges and other structures with relative ease.

5. Disagree. Computers have been of tremendous help to researchers in the biological, physical and social sciences.

6. Disagree. Chemists and physicists, not poets and physicists, rely on computers to control and check sensitive laboratory instruments.

7. Agree. Computers can be used to compose music, write poems and produce drawings and paintings.

8. Disagree. According to the text, computers do not have intelligence in the way humans do and cannot think for themselves.

9. Disagree. The text says computers execute instructions quickly and can store huge amounts of information on magnetic media.

VIII. Plan of the text

1. People’s experience of using computers.

2. Different ideas and images associated with computers.

3. Computers in manufacturing, engineering and space exploration.

4. Computers in scientific research and astronomy.

5. Computers in art and the humanities.

6. The capabilities and limitations of computers.

7. Fast processing, data storage and decreasing cost.

IX. Advantages and disadvantages of computers

Computers have many advantages. They can process information quickly, store large amounts of data and perform complicated calculations. They help people work, study, communicate and solve scientific and engineering problems. Computers can also be used to create music, drawings and other works of art.

However, computers also have disadvantages. They can fail or be affected by viruses, and personal data may be stolen. Spending too much time at a computer can be bad for health. People may also become too dependent on technology. Computers are useful tools, but they should be used carefully and responsibly.

X. Match the word partnerships

1 — b. mobile phone

2 — d. data processing

3 — e. training course

4 — a. work station

5 — c. sales team

XI. Complete the conversation

6. cost

7. expensive

8. buy

9. send

A: How much does the new laptop cost?

B: £449.

A: That’s very expensive. My new one was only £349. Are you going to buy it?

B: I don’t know. Perhaps I need to send George an email and ask him. He’s an expert.

A: Good idea.

XII. Choose the correct answer

1 — B. is

2 — A. and

3 — A. has got

4 — A. travels

5 — B. a system analyst

6 — C. doesn’t

7 — B. There

8 — C. his

John is from the USA and works for a big computer company. The company has got 2,000 employees. He’s based in the London office but he often travels around Europe. He is a system analyst. He doesn’t work on Mondays and Tuesdays but he works at the weekend. There are six people in his team. He likes his job because it’s very interesting.

XIII. Complete the conversation

1 — b. Pleased to meet you

2 — f. No, I don’t

3 — g. GF Systems

4 — d. Oh, congratulations

5 — a. Absolutely – it’s very interesting

6 — c. In San Francisco

7 — e. I’d love to

XIV. Complete the booking form

1. Department: IT Department

PERSON 1

2. Name: Mansoor Khan

3. Job: Web designer

4. Course: Setting up a network

5. Preferred date: 21st May

PERSON 2

6. Name: Guy Danvers

7. Job: Head of IT Department

8. Course: Security procedures

9. Preferred date: 14th May

XV. Complete the sentences

1. John designs networks. He’s a network architect.

2. I’ve got a new hard disc drive for my laptop.

3. I must burn some CDs.

4. Sarah is the new IT support officer.
